DESIGN BRIEF

Lincoln Park Opera House in Chicago, Illinois
Inspired by the grandeur of the Paris Opera House by Garnier. This opera house is designed as a "jewel box" that serves as a cultural landmark for the community. Beyond its primary function as a performance venue, the building integrates a restaurant, café, ballroom, gift shop, rentable event spaces, and outdoor patio to ensure year-round public engagement.

The design explores curvilinear interior forms while emphasizing mesmerizing interiors with backlit stained glass, rich materials, and carefully orchestrated lighting, creating a space that captivates visitors beyond the performances. This Lincoln Park Opera House invites the public to experience the building itself as an architectural masterpiece, fostering a sense of wonder, connection, and community.

DESIGN BRIEF

Firehouse designed for the town of Niles, Michigan. The site for this firehouse borders a riverside park on the west and the entrance to the small town on the east. This is designed to fit in with the town's other historic buildings but also respond to the park and pedestrian areas. This is accomplished through quaint vernacular design and a small firehouse museum bordering the park.

SITE PLAN

DESIGN BRIEF

- Restoration of the historic 100 Center (Kamm & Schellinger Brewery) in Mishawaka, Indiana.
 - Event Center & Loft Prototype
- The 100 Center complex will be modernized while preserving its historic character. Vibrant restaurants & shops will attract both visitors & residents, bringing energy to the space. A modern glass atrium divides the main structure creating a dynamic interior that provides shelter while maintaining a strong connection with the environment.

DESIGN BRIEF

Genesis Center Facade Revitalization | Gary, IN
Housing & Community Regeneration Initiative | Gary Charette

Proposed revitalization of the abandoned Genesis Center, a modernist structure built in the 1980s, through a community-driven art installation. The design concept reimagines the building’s exterior as a dynamic canvas for local artists, using projected lights or vinyl art that can be periodically updated via community competitions.

This tactical approach brings vibrant color and energy to a blighted area, fostering community engagement and signaling renewal in the heart of Gary.
